Test Case Execution Document

Product Search & Cart Module Testing

Application Under Test	Demo Web Shop — https://demowebshop.tricentis.com/
Modules Covered	Product Search, Add Product to Cart, Update Cart Quantity, Remove Product from Cart
Prepared By	Kaleemuddin

TC_001 | Product Search

Test Case ID: TC_001

Module: Product Search

Test Scenario: Verify that the application returns the correct product when a user searches using a valid full product name.

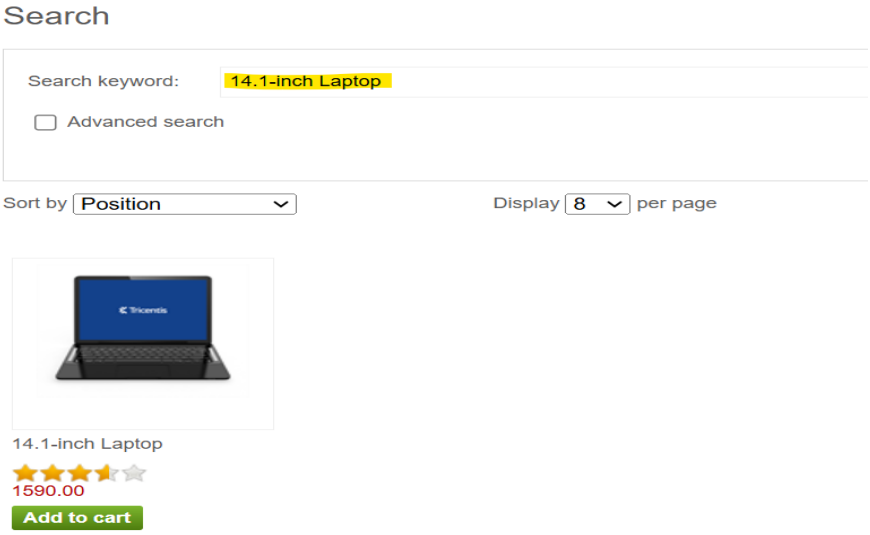
Test Data: 14.1-inch Laptop

Expected Result: The matching product should appear in the search results without any error.

Status: PASS

Execution Steps

1. Open the Demo Web Shop website in the browser.
2. Locate the search box at the top of the page.
3. Enter the product name **14.1-inch Laptop** in the search field.
4. Click the Search button.
5. Observe the search results page.
6. Verify whether the correct product is displayed.



TC_002 | Product Search

Test Case ID: TC_002

Module: Product Search

Test Scenario: Verify that the application returns relevant results when a user searches using a valid partial keyword.

Test Data: laptop

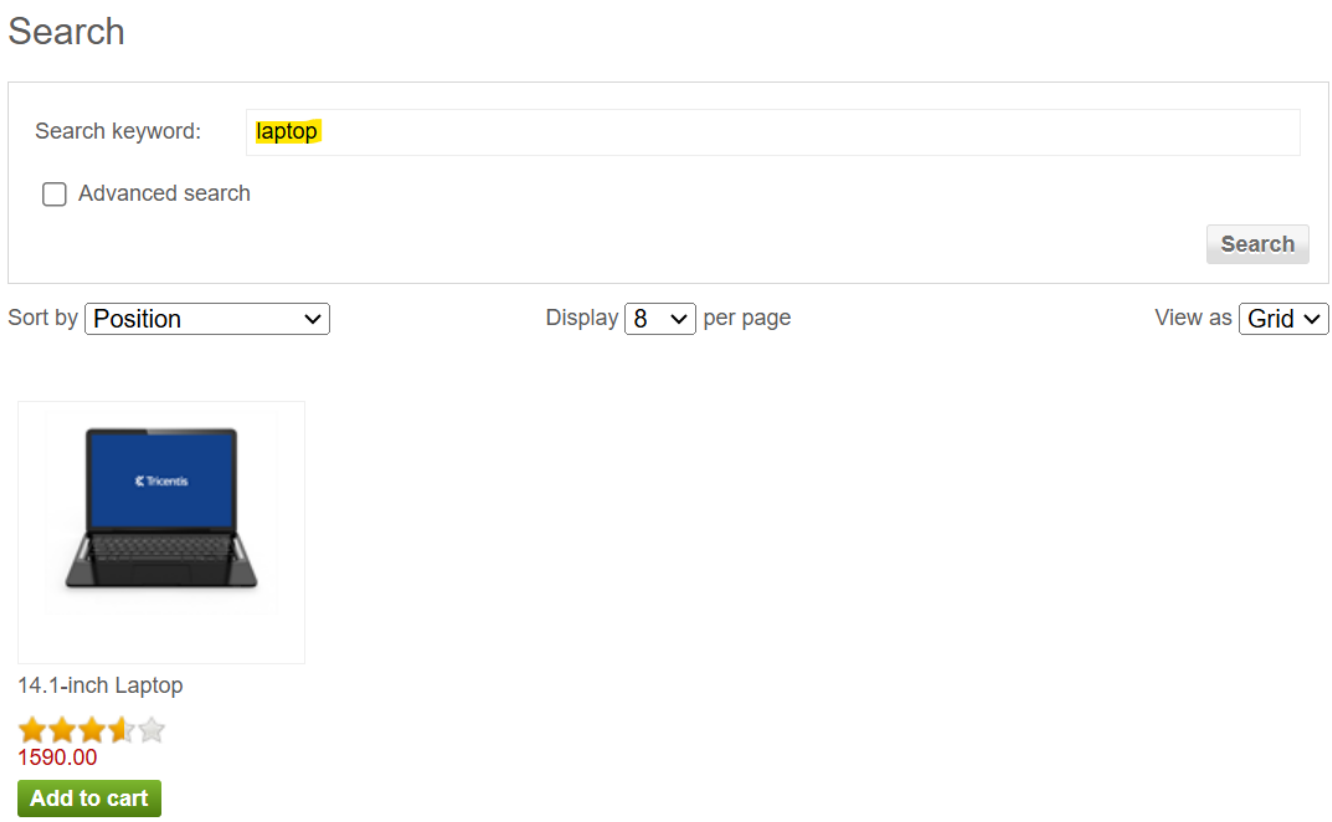
Expected Result: Relevant matching products related to the entered keyword should appear in the search results.

Status: PASS

Execution Steps

1. Open the Demo Web Shop website in the browser.
2. Locate the search box at the top of the page.
3. Enter the partial keyword **laptop** in the search field.
4. Click the Search button.
5. Observe the search results page.
6. Verify whether relevant laptop-related products are displayed.

Result:



TC_003 | Product Search

Test Case ID: TC_003

Module: Product Search

Test Scenario: Verify that the application filters search results correctly when a user searches with a keyword and selects a matching category.

Test Data: Keyword: computer; Category: Computers

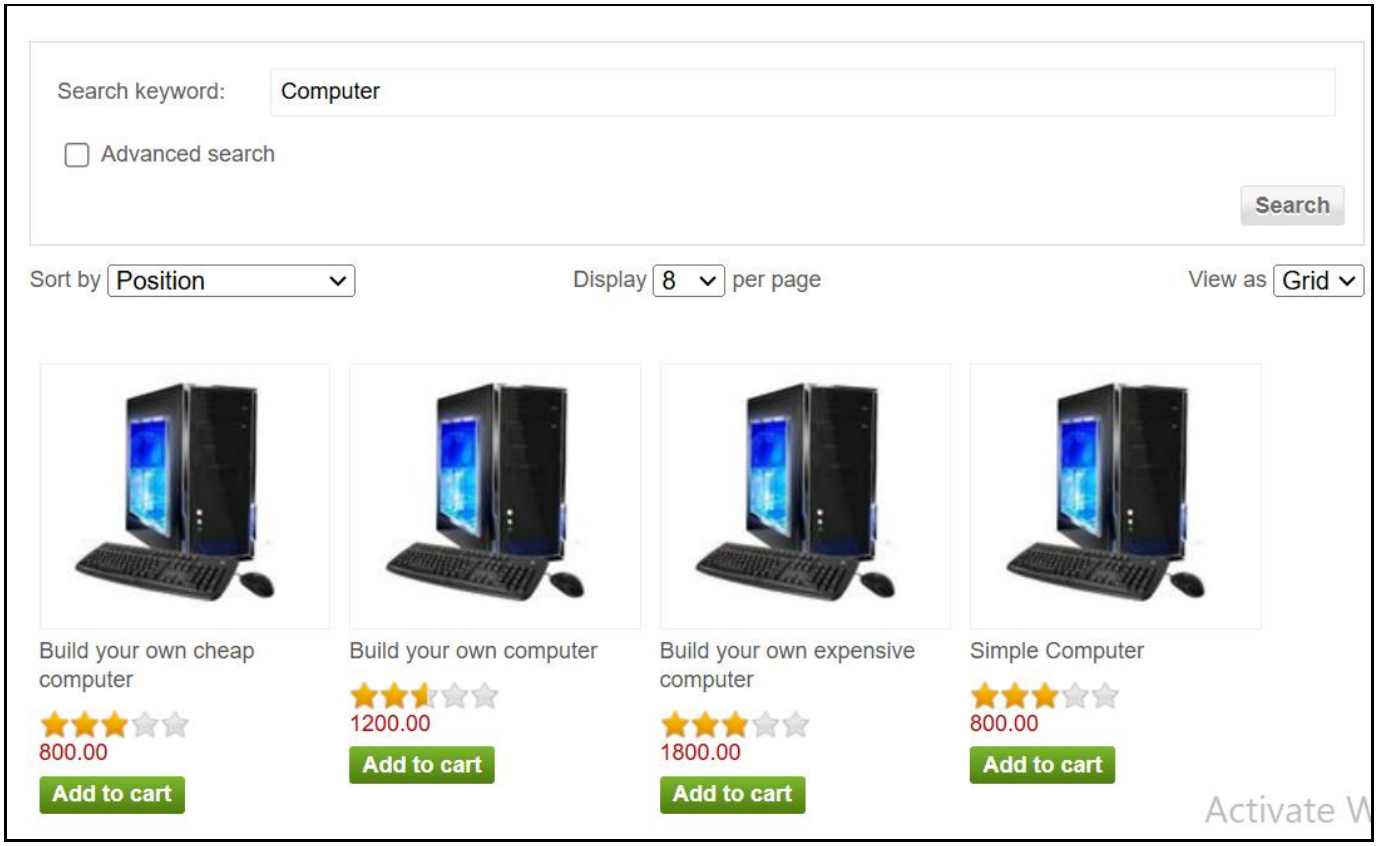
Expected Result: The search results should display products relevant to the keyword and selected category only.

Status: Pass

Execution Steps

1. Open the Demo Web Shop website in the browser.
2. Navigate to the Search page or use the advanced search options.
3. Enter the keyword **computer** in the search field.
4. Select the category Computers from the category dropdown.
5. Click the Search button.
6. Verify whether the displayed results belong to the selected category and match the keyword.

Result:



TC_004 | Product Search

Test Case ID: TC_004

Module: Product Search

Test Scenario: Verify that the application filters products correctly when a user searches using a manufacturer filter.

Test Data: Manufacturer: Tricentis

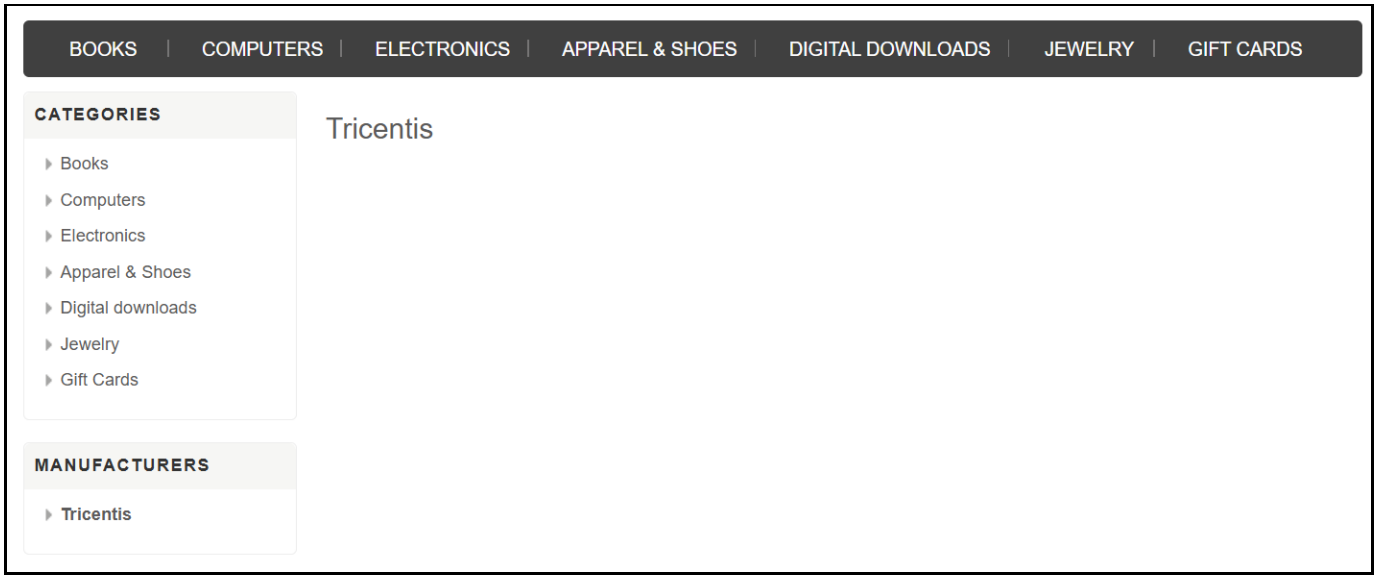
Expected Result: Products belonging to the selected manufacturer should appear in the search results.

Status: PASS

Execution Steps

1. Open the Demo Web Shop website in the browser.
2. Go to the Search page with advanced search options.
3. Select **Tricentis** from the manufacturer dropdown.
4. Click the Search button.
5. Observe the search results page.
6. Verify whether the displayed products belong to the selected manufacturer.

Result:



TC_005 | Product Search

Test Case ID: TC_005

Module: Product Search

Test Scenario: Verify that the application returns products when the search keyword is found in product descriptions.

Test Data: gift

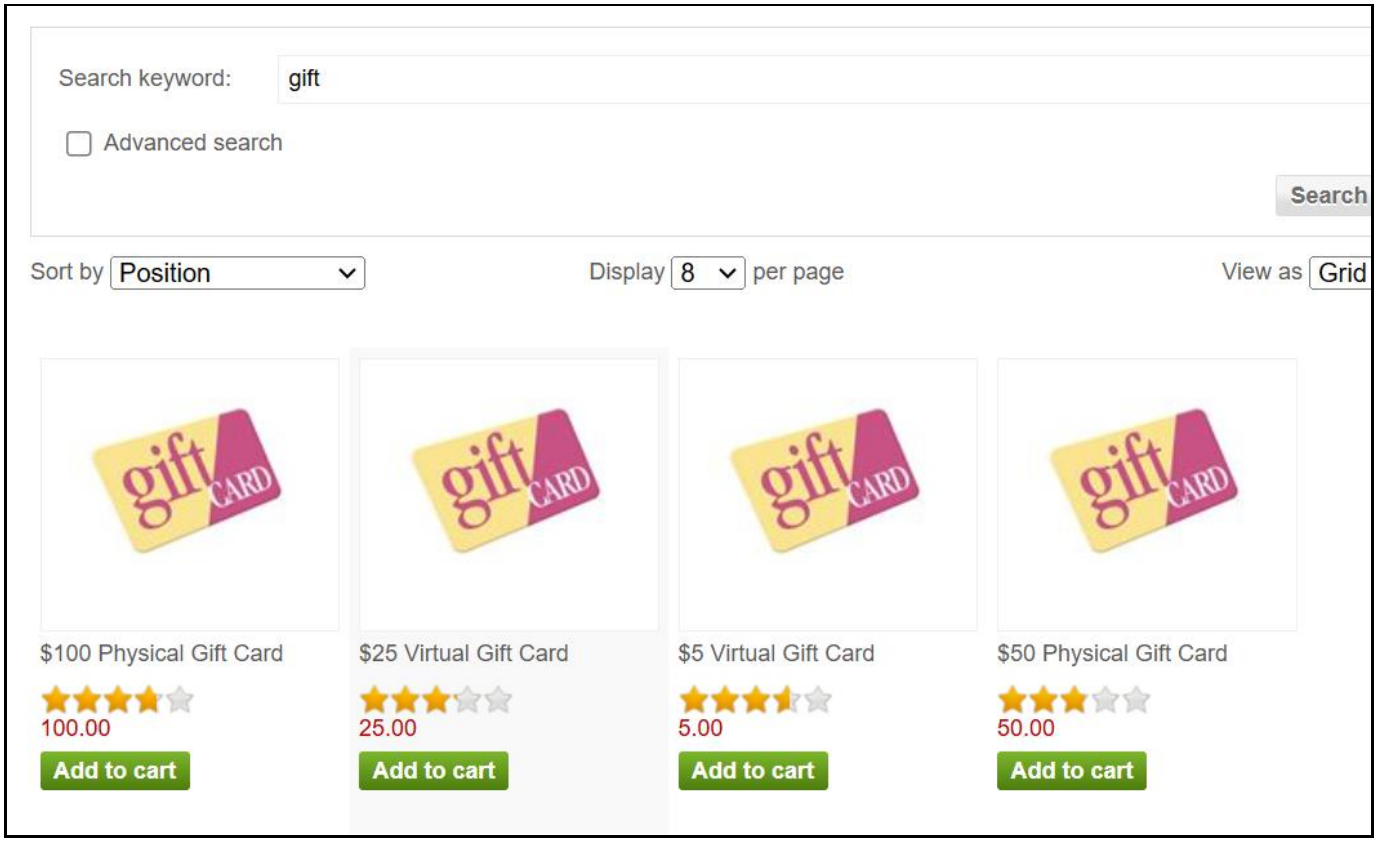
Expected Result: Products with the keyword present in their descriptions should appear in the search results.

Status: PASS

Execution Steps

1. Open the Demo Web Shop website in the browser.
2. Navigate to the Search page.
3. Enter the keyword **gift** in the search field.
4. Enable the option to search in product descriptions.
5. Click the Search button.
6. Verify whether products with matching descriptions are displayed.

Result:



TC_006 | Product Search

Test Case ID: TC_006

Module: Product Search

Test Scenario: Verify that the application handles a non-existing search keyword correctly.

Test Data: zzzz_invalid_item

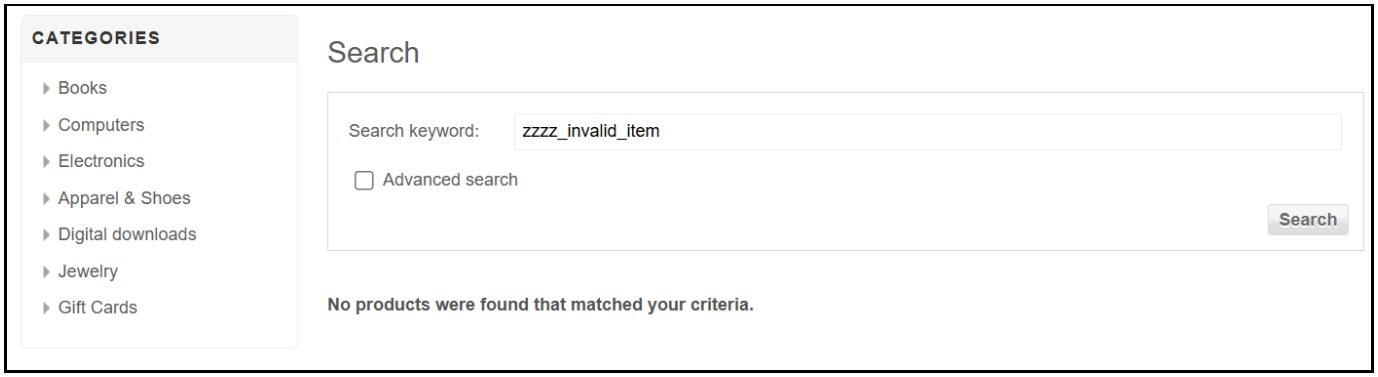
Expected Result: The application should show no matching results or an appropriate no-results message.

Status: Pass

Execution Steps

1. Open the Demo Web Shop website in the browser.
2. Locate the search box.
3. Enter the invalid keyword **zzzz_invalid_item** in the search field.
4. Click the Search button.
5. Observe the search results page.
6. Verify whether a no-results message or empty result set is displayed.

Result:



TC_007 | Product Search

Test Case ID: TC_007

Module: Product Search

Test Scenario: Verify that the application handles a blank search input without crashing or showing invalid behavior.

Test Data: Blank input

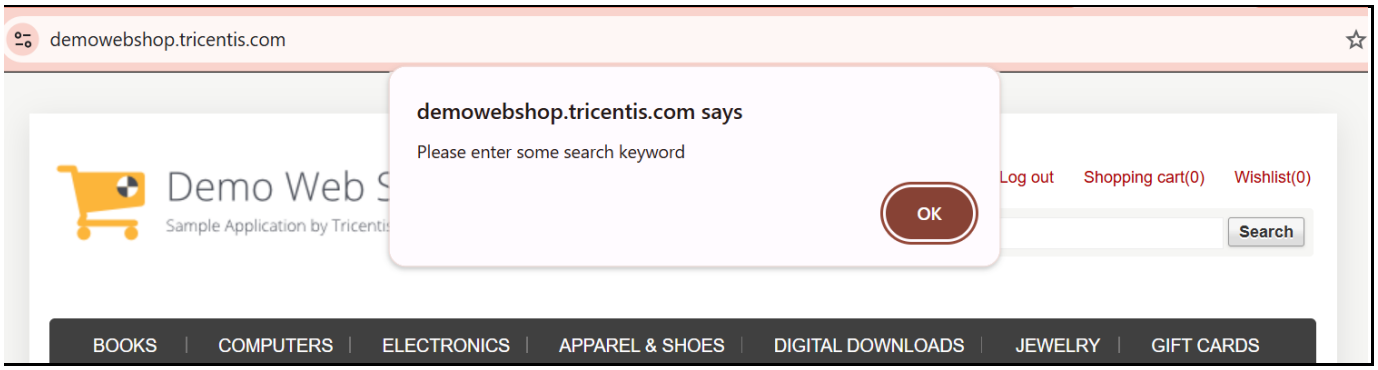
Expected Result: The application should handle the blank input gracefully and display an appropriate response.

Status: PASS

Execution Steps

1. Open the Demo Web Shop website in the browser.
2. Locate the search box.
3. Keep the search box empty.
4. Click the Search button.
5. Observe the system response.
6. Verify whether the application handles the blank input properly.

Result:



TC_008 | Product Search

Test Case ID: TC_008

Module: Product Search

Test Scenario: Verify that the application handles a single-character search input correctly.

Test Data: a

Expected Result: The application should return valid results or an appropriate response without any error.

Status: PASS

Execution Steps

1. Open the Demo Web Shop website in the browser.
2. Locate the search box.
3. Enter **a** in the search field.
4. Click the Search button.
5. Observe the search results page.
6. Verify whether the system responds correctly for a single-character input.

Result:

TC_009 | Product Search

Test Case ID: TC_009

Module: Product Search

Test Scenario: Verify that the application handles a very long search string correctly without breaking the search functionality.

Test Data: 15+ character input string

Expected Result: The application should process the long input without crashing or showing formatting issues.

Actual Result:

Status:

Execution Steps

1. Open the Demo Web Shop website in the browser.
2. Locate the search box.
3. Enter a very long input string containing more than 15 characters.
4. Click the Search button.
5. Observe the system response and search results page.
6. Verify whether the application handles the long input correctly.

Result:

TC_010 | Product Search

Test Case ID: TC_010

Module: Product Search

Test Scenario: Verify that the application handles special characters entered in the search field correctly.

Test Data: @#$%^&*

Expected Result: The application should handle the special character input gracefully without crashing.

Status: PASS

Execution Steps

1. Open the Demo Web Shop website in the browser.
2. Locate the search box.
3. Enter @#$%^&* in the search field.
4. Click the Search button.
5. Observe the response page.
6. Verify whether the application handles the special characters properly.

TC_011 | Product Search

Test Case ID: TC_011

Module: Product Search

Test Scenario: Verify that the application returns products correctly when a valid price range is entered in advanced search.

Test Data: select a price range 10 to 1000

Expected Result: Products within the entered price range should appear in the search results if available.

Status: PASS

Execution Steps

1. Open the Demo Web Shop website in the browser.
2. Navigate to the advanced search section.
3. Enter a valid keyword if needed.
4. Enter 10 in the From price field and 1000 in the To price field.
5. Click the Search button.
6. Verify whether products within the selected price range are displayed.

Result:

Search keyword: Desktop

☑ Advanced search

Category: All

☐ Automatically search sub categories

Manufacturer: All

Price range: From 10 to 1000

☐ Search In product descriptions

500.00

TC_012 | Product Search

Test Case ID: TC_012

Module: Product Search

Test Scenario: Verify that the application handles an invalid price range where the From price is greater than the To price.

Test Data: From price: 500; To price: 100

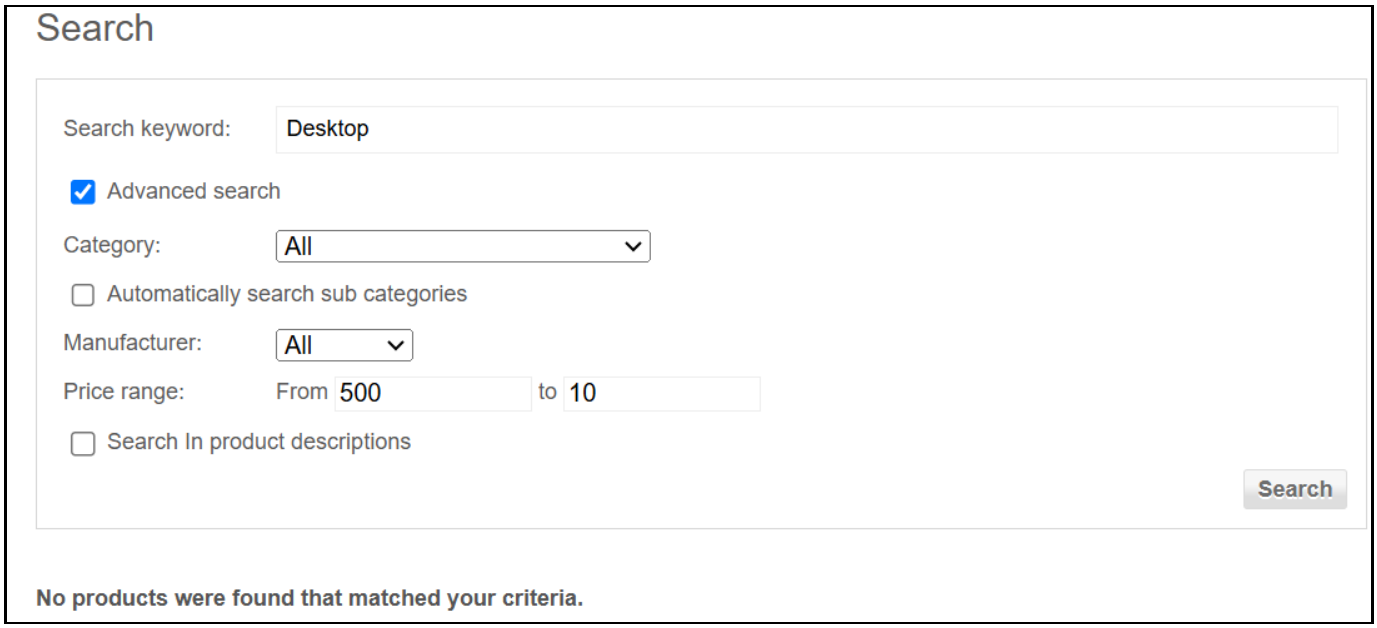
Expected Result: The application should handle the invalid price range gracefully and should not crash.

Status: PASS

Execution Steps

1. Open the Demo Web Shop website in the browser.
2. Navigate to the advanced search section.
3. Enter 500 in the From price field.
4. Enter 100 in the To price field.
5. Click the Search button.
6. Verify whether the application handles the invalid range properly.

Result:



TC_013 | Add Product to Cart

Test Case ID: TC_013

Module: Add Product to Cart

Test Scenario: Verify that a user can add a simple product to the cart from the product page.

Test Data: Simple product

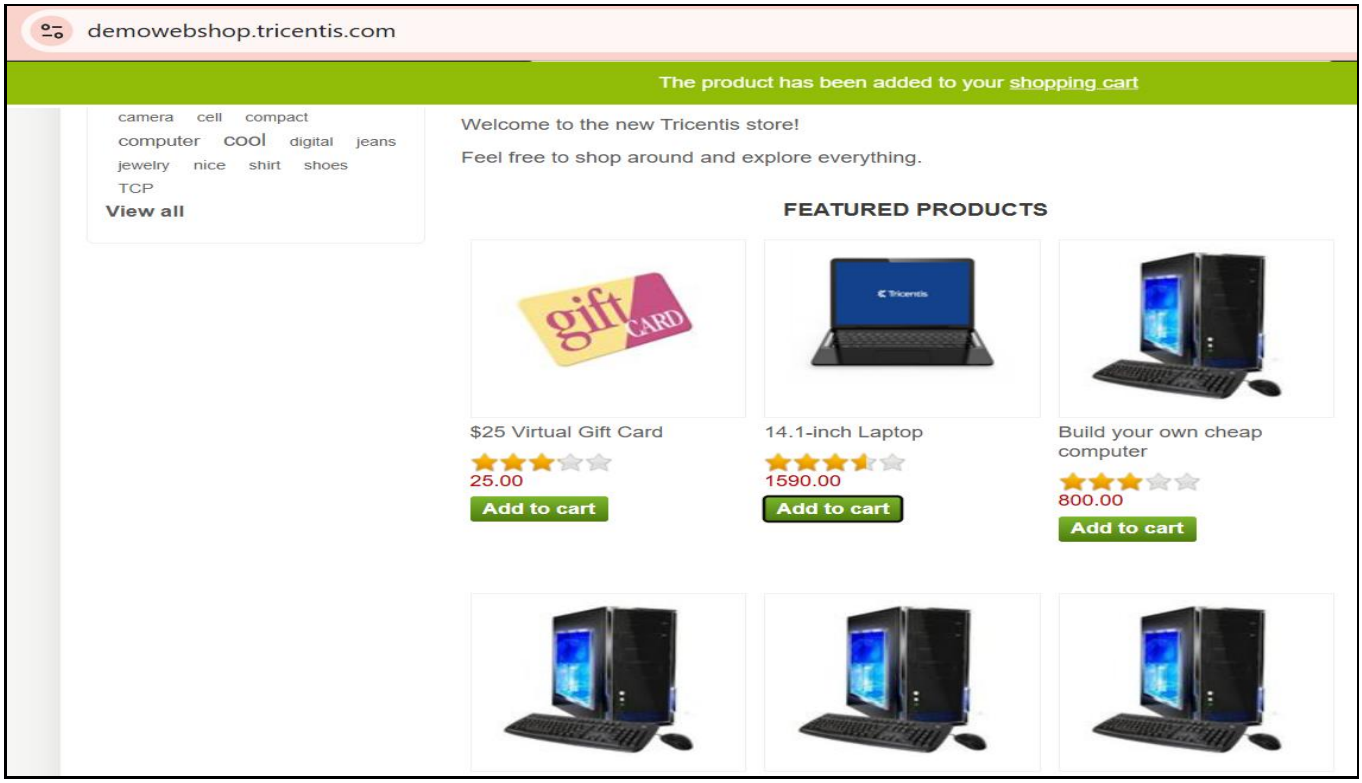
Expected Result: The selected product should be added to the cart successfully.

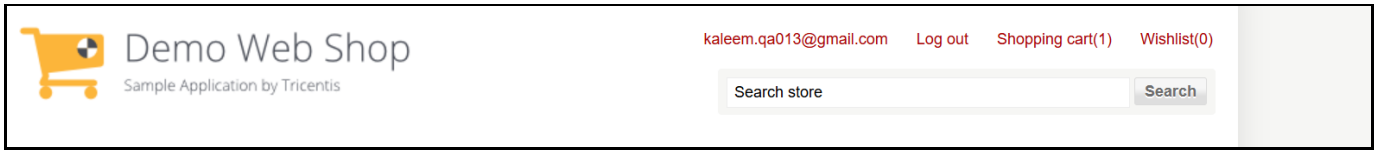
Status: PASS

Execution Steps

1. Open the Demo Web Shop website in the browser.
2. Navigate to a product page for a simple product.
3. Review the product details.
4. Click the Add to cart button.
5. Observe the cart notification or cart count.
6. Verify whether the product is added successfully to the cart.

Result:





TC_014 | Add Product to Cart

Test Case ID: TC_014

Module: Add Product to Cart

Test Scenario: Verify that a user can add a product to the cart after finding it through search results.

Test Data: Keyword: laptop

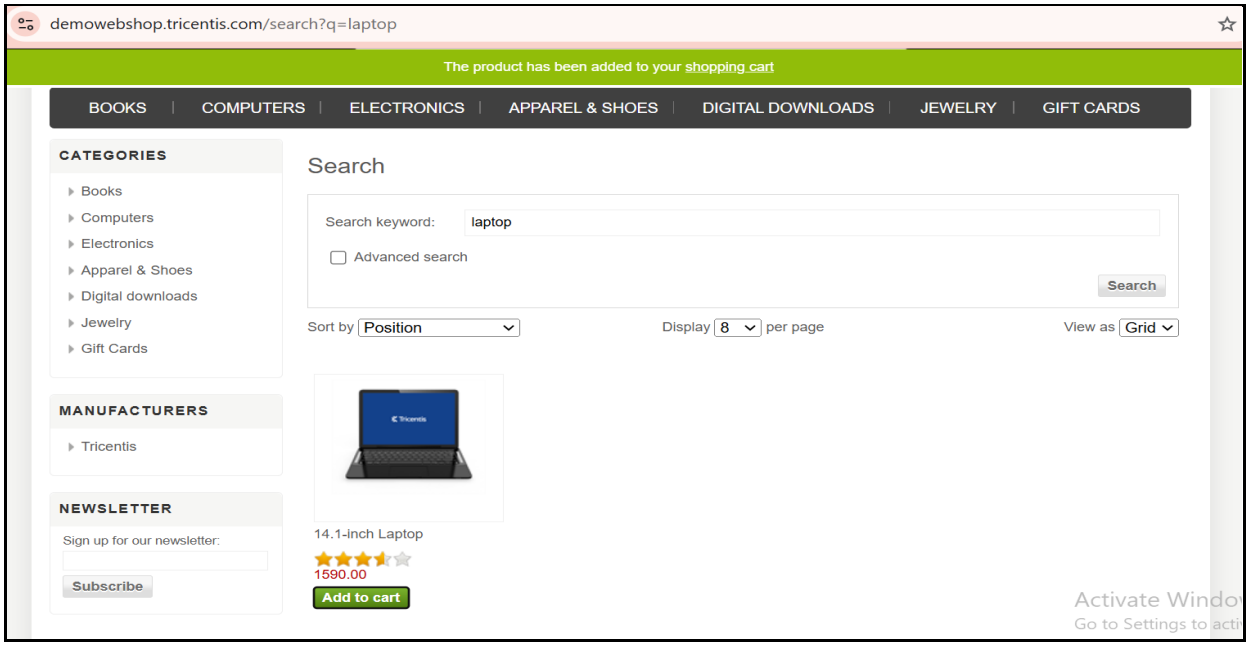
Expected Result: The selected product from the search results should be added to the cart successfully.

Status: PASS

Execution Steps

1. Open the Demo Web Shop website in the browser.
2. Search for the keyword laptop.
3. Open the relevant product from the search results.
4. Click the Add to cart button.
5. Observe the cart notification or cart count.
6. Verify whether the product is added to the cart successfully.

Result:



TC_015 | Add Product to Cart

Test Case ID: TC_015

Module: Add Product to Cart

Test Scenario: Verify that a product can be added to the cart with the default quantity of 1.

Test Data: Quantity: 1

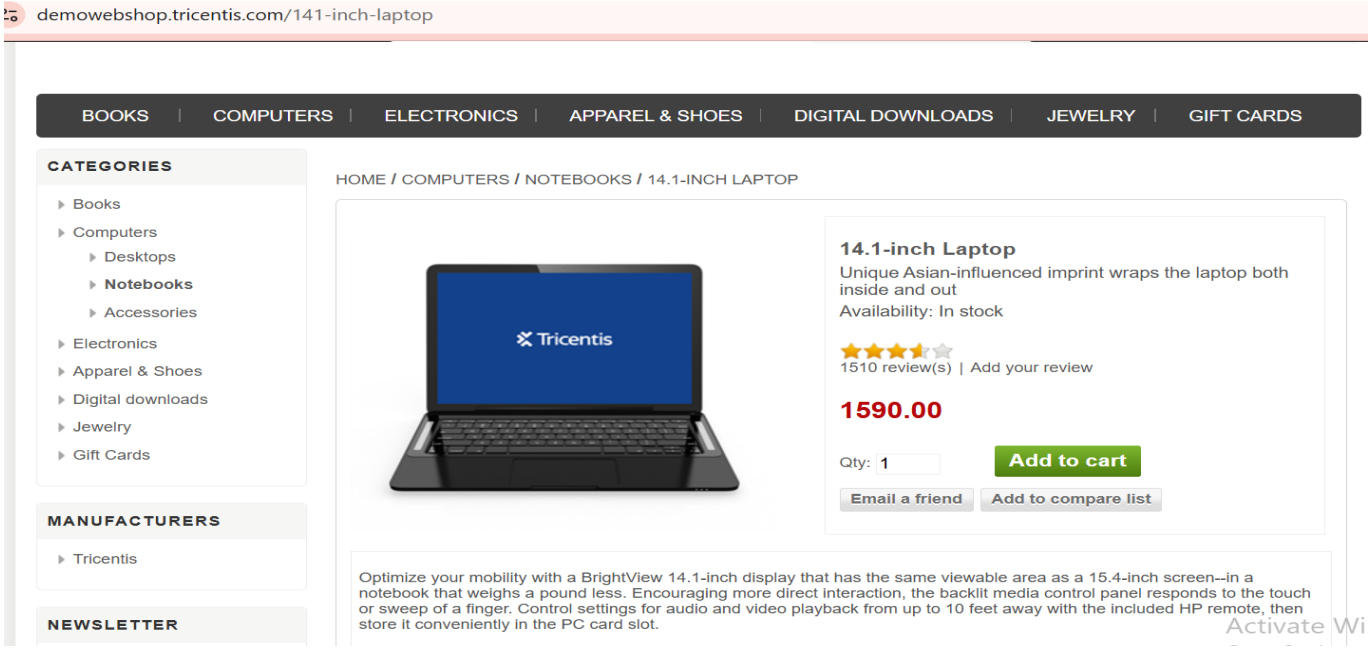
Expected Result: The product should be added to the cart with quantity 1.

Actual Result:

Status:

Execution Steps

1. Open the Demo Web Shop website in the browser.
2. Navigate to a product page.
3. Ensure the quantity field is set to 1.
4. Click the Add to cart button.
5. Open the cart if needed.
6. Verify whether the product is added with quantity 1.



TC_016 | Add Product to Cart

Test Case ID: TC_016

Module: Add Product to Cart

Test Scenario: Verify that a product can be added to the cart with a quantity greater than 1.

Test Data: Quantity: 2

Expected Result: The product should be added to the cart with the entered quantity.

Status:

Execution Steps

1. Open the Demo Web Shop website in the browser.
2. Navigate to a product page.
3. Change the quantity field to 2.
4. Click the Add to cart button.
5. Open the cart if needed.
6. Verify whether the product is added with quantity 2.

Result:

TC_017 | Add Product to Cart

Test Case ID: TC_017

Module: Add Product to Cart

Test Scenario: Verify that the application handles a quantity value of 0 correctly while adding a product to the cart.

Test Data: Quantity: 0

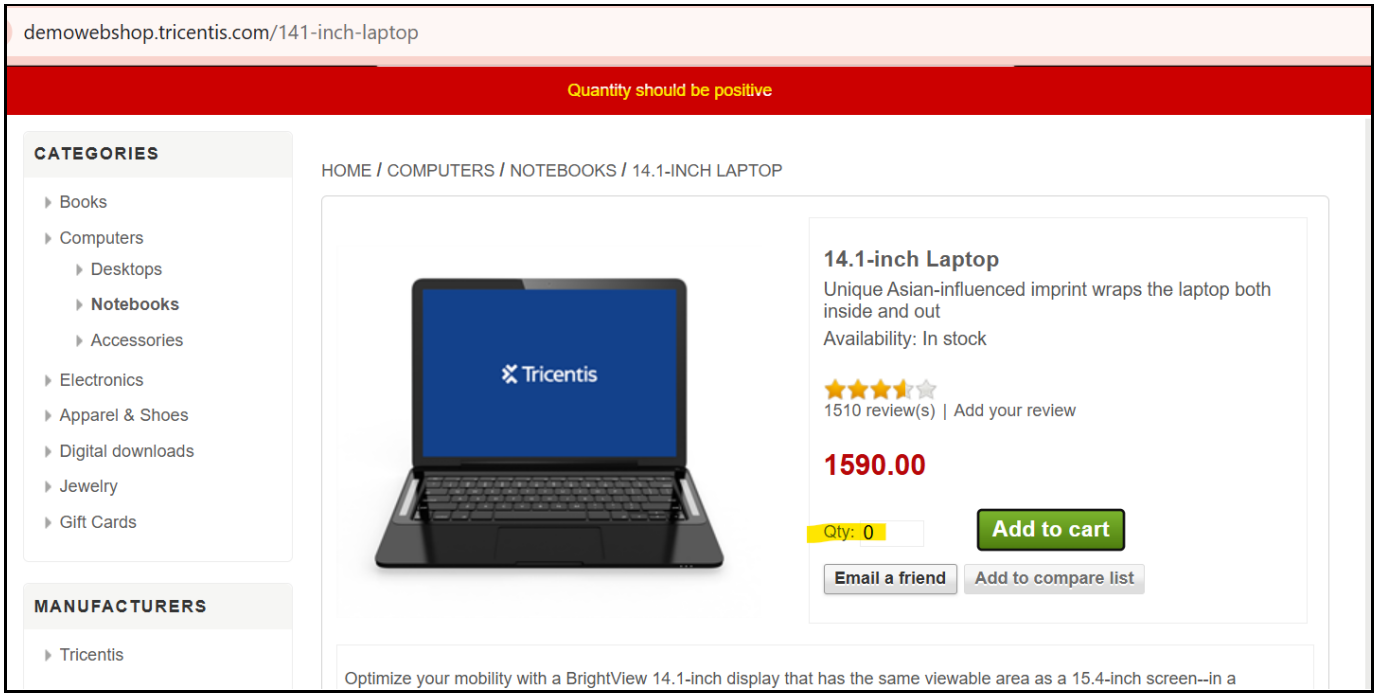
Expected Result: The system should reject the invalid quantity or should not add the product to the cart.

Status:

Execution Steps

1. Open the Demo Web Shop website in the browser.
2. Navigate to a product page.
3. Change the quantity field to 0.
4. Click the Add to cart button.
5. Observe the system response.
6. Verify whether the invalid quantity is rejected or not added.

Result:



TC_018 | Add Product to Cart

Test Case ID: TC_018

Module: Add Product to Cart

Test Scenario: Verify that the application handles a negative quantity correctly while adding a product to the cart.

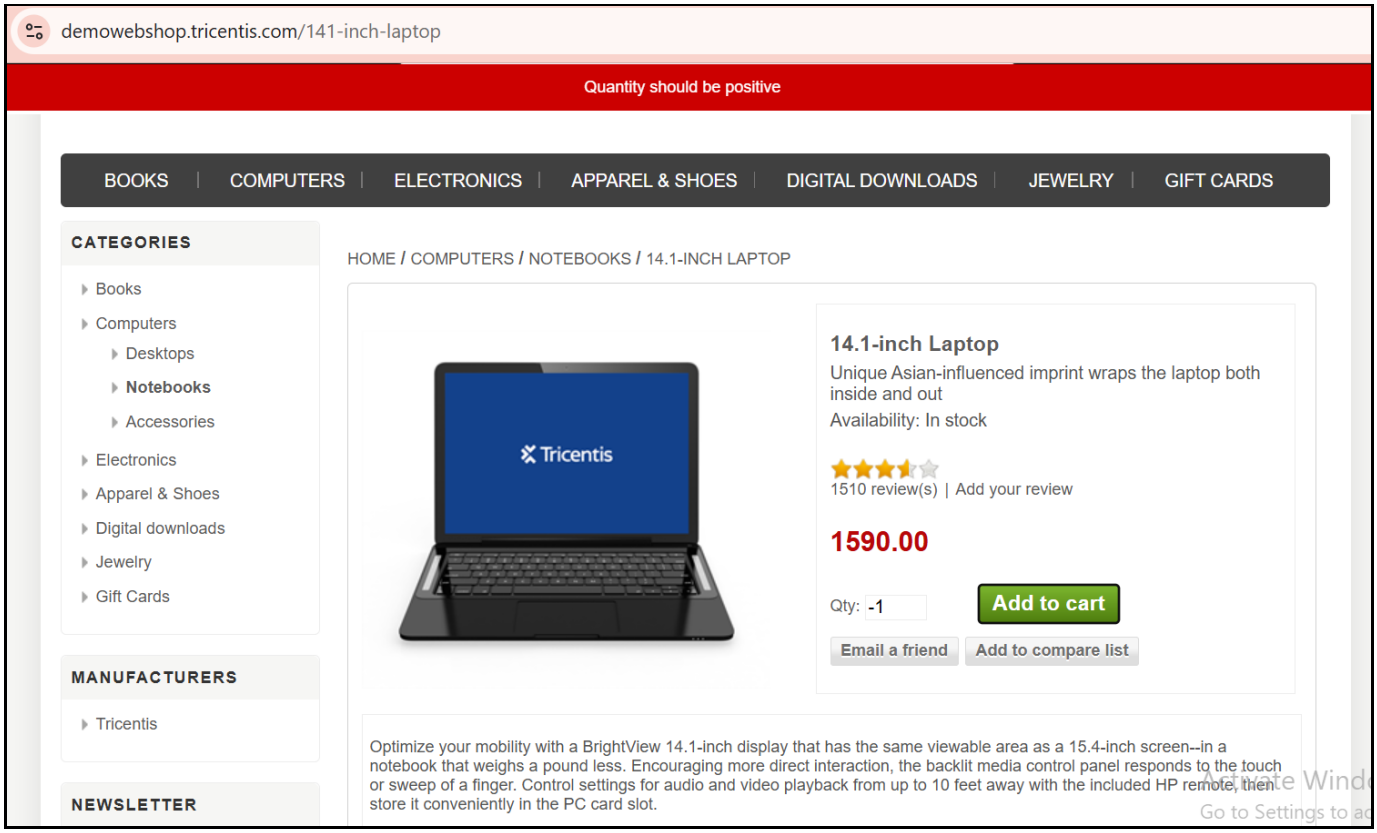
Test Data: Quantity: -1

Expected Result: The system should reject the negative quantity and should not add the product to the cart.

Status:

Execution Steps

1. Open the Demo Web Shop website in the browser.
2. Navigate to a product page.
3. Change the quantity field to -1.
4. Click the Add to cart button.
5. Observe the system response.
6. Verify whether the negative quantity is rejected properly.



TC_019 | Add Product to Cart

Test Case ID: TC_019

Module: Add Product to Cart

Test Scenario: Verify that the application shows validation when a product with mandatory fields is added to the cart without filling required information.

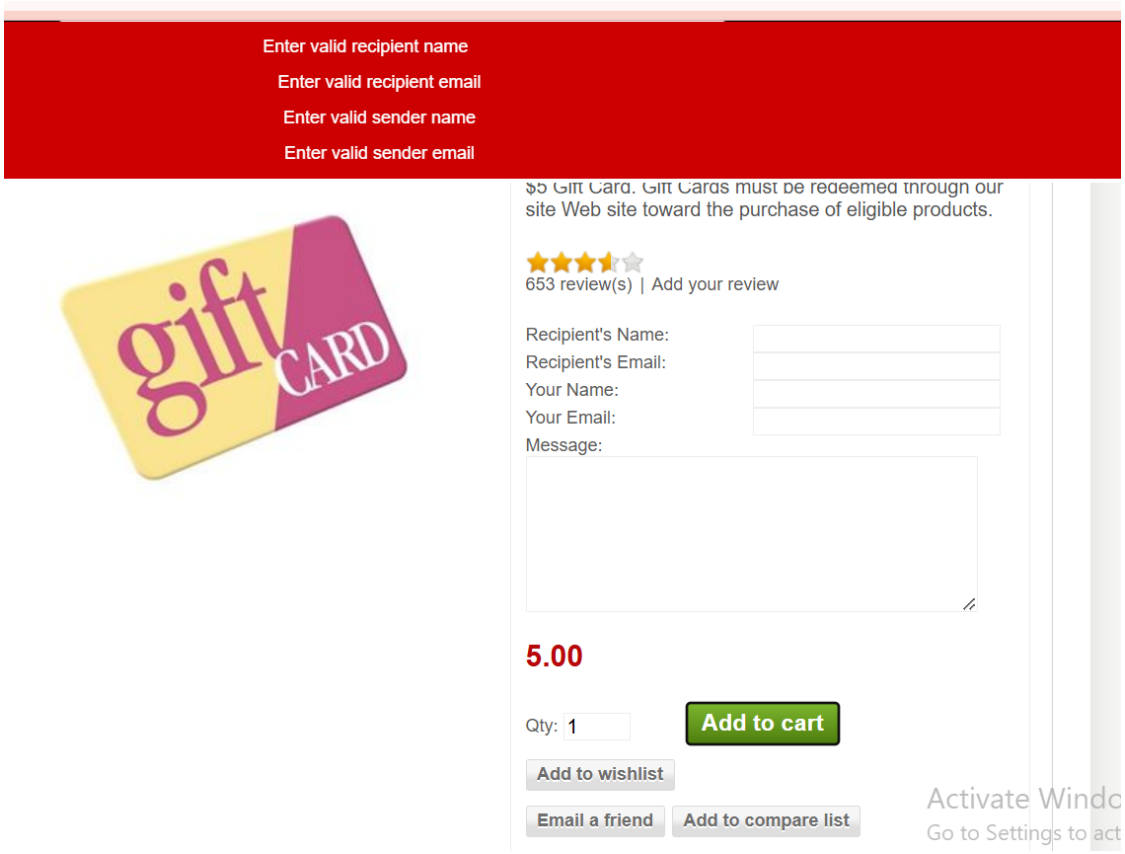
Test Data: Mandatory fields left blank on gift card product

Expected Result: Validation messages should appear and the product should not be added to the cart.

Status: PASS

Execution Steps

1. Open the Demo Web Shop website in the browser.
2. Navigate to a gift card product page with mandatory fields.
3. Leave all required fields blank.
4. Click the Add to cart button.
5. Observe the validation messages on the page.
6. Verify whether the product is blocked from being added without required details.



TC_020 | Update Cart Quantity

Test Case ID: TC_020

Module: Update Cart Quantity

Test Scenario: Verify that the cart quantity can be increased successfully for an existing product.

Test Data: Update quantity from 1 to 2

Expected Result: The quantity and subtotal should update correctly after increasing the quantity.

Status: PASS

Execution Steps

1. Open the Demo Web Shop website in the browser.
2. Add a product to the cart if not already present.
3. Open the shopping cart page.
4. Change the quantity from 1 to 2.
5. Click the Update shopping cart button.
6. Verify whether the quantity and subtotal are updated correctly.

TC_021 | Update Cart Quantity

Test Case ID: TC_021

Module: Update Cart Quantity

Test Scenario: Verify that the cart quantity can be decreased successfully for an existing product.

Test Data: Update quantity from 2 to 1

Expected Result: The quantity and subtotal should update correctly after decreasing the quantity.

Status: PASS

Execution Steps

1. Open the Demo Web Shop website in the browser.
2. Ensure a product with quantity 2 is present in the cart.
3. Open the shopping cart page.
4. Change the quantity from 2 to 1.
5. Click the Update shopping cart button.
6. Verify whether the quantity and subtotal are updated correctly.

TC_022 | Update Cart Quantity

Test Case ID: TC_022

Module: Update Cart Quantity

Test Scenario: Verify that the application handles updating the cart quantity to 0 correctly.

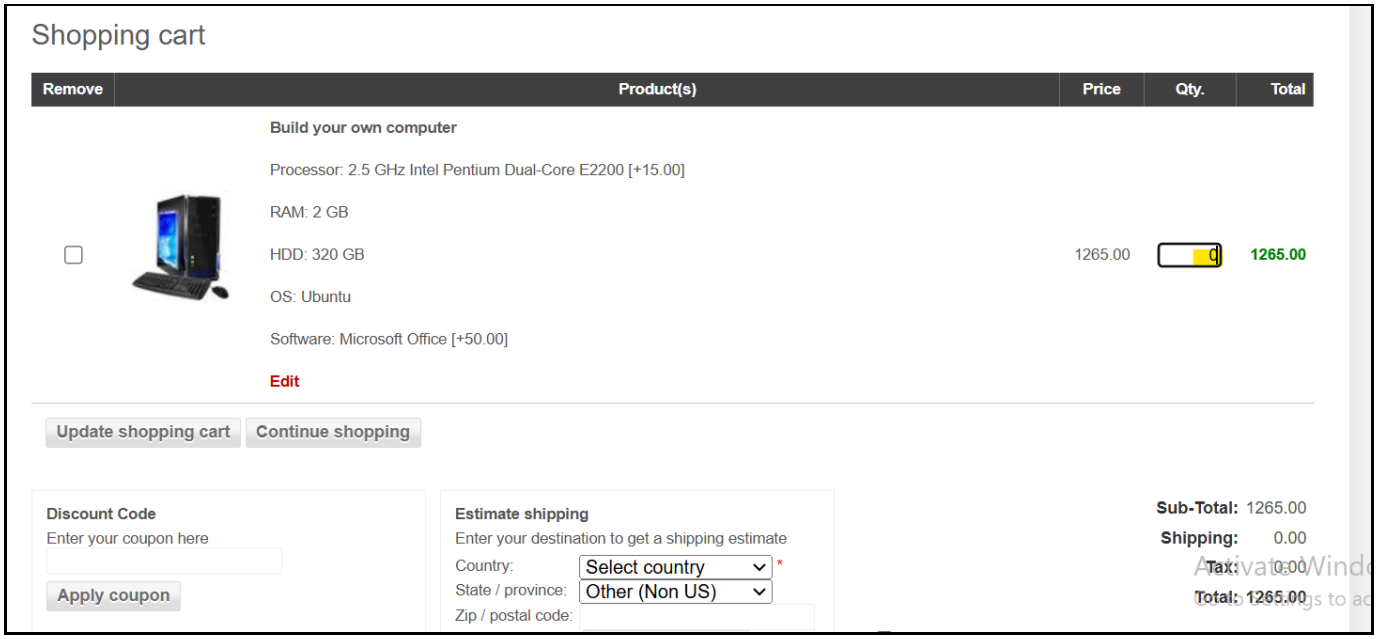
Test Data: Quantity: 0

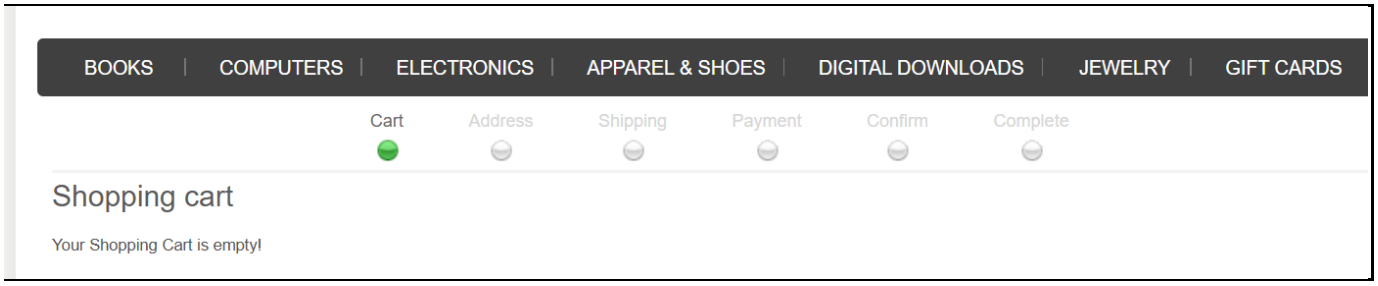
Expected Result: The item should either be removed from the cart or the system should handle the input gracefully.

Status: PASS

Execution Steps

1. Open the Demo Web Shop website in the browser.
2. Ensure a product is present in the cart.
3. Open the shopping cart page.
4. Change the quantity field to 0.
5. Click the Update shopping cart button.
6. Verify whether the product is removed or the system handles the value correctly.





TC_023 | Update Cart Quantity

Test Case ID: TC_023

Module: Update Cart Quantity

Test Scenario: Verify that the application handles non-numeric input in the cart quantity field correctly.

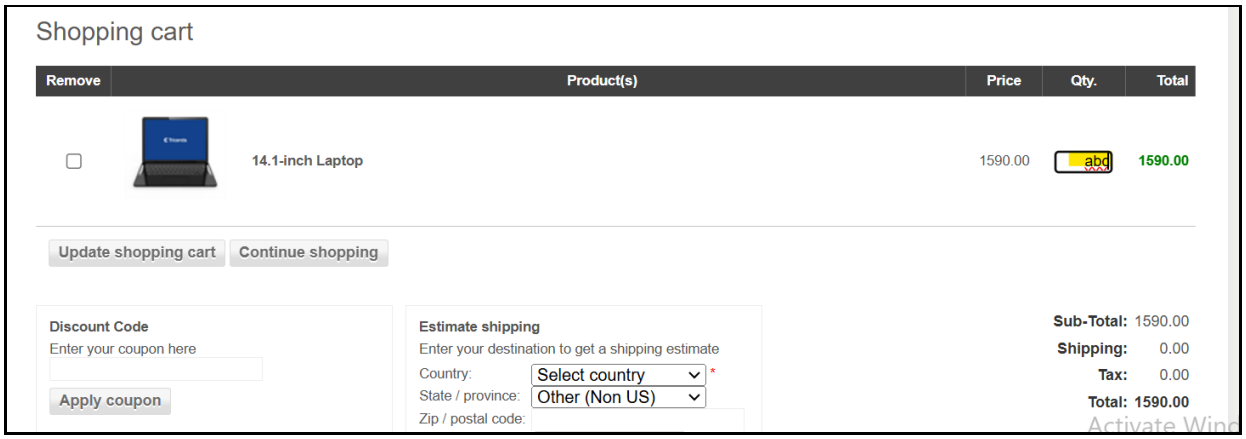
Test Data: Quantity: **abc**

Expected Result: The system should not accept non-numeric input and should handle it appropriately.

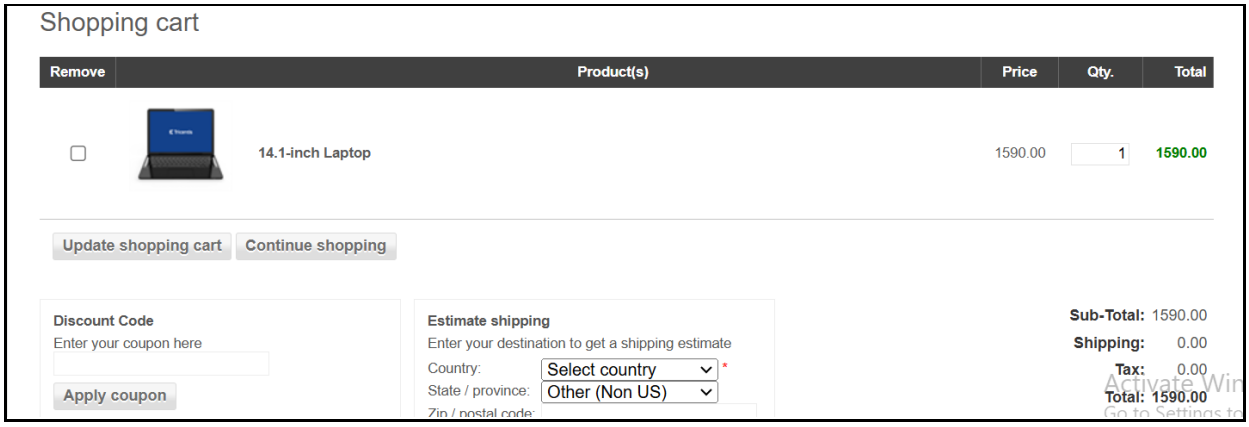
Status: PASS

Execution Steps

1. Open the Demo Web Shop website in the browser.
2. Ensure a product is present in the cart.
3. Open the shopping cart page.
4. Enter abc in the quantity field.
5. Click the Update shopping cart button.
6. Verify whether the system rejects the invalid non-numeric input.



The quantity became 1 by itself.



TC_024 | Remove Product from Cart

Test Case ID: TC_024

Module: Remove Product from Cart

Test Scenario: Verify that a single product can be removed successfully from the shopping cart.

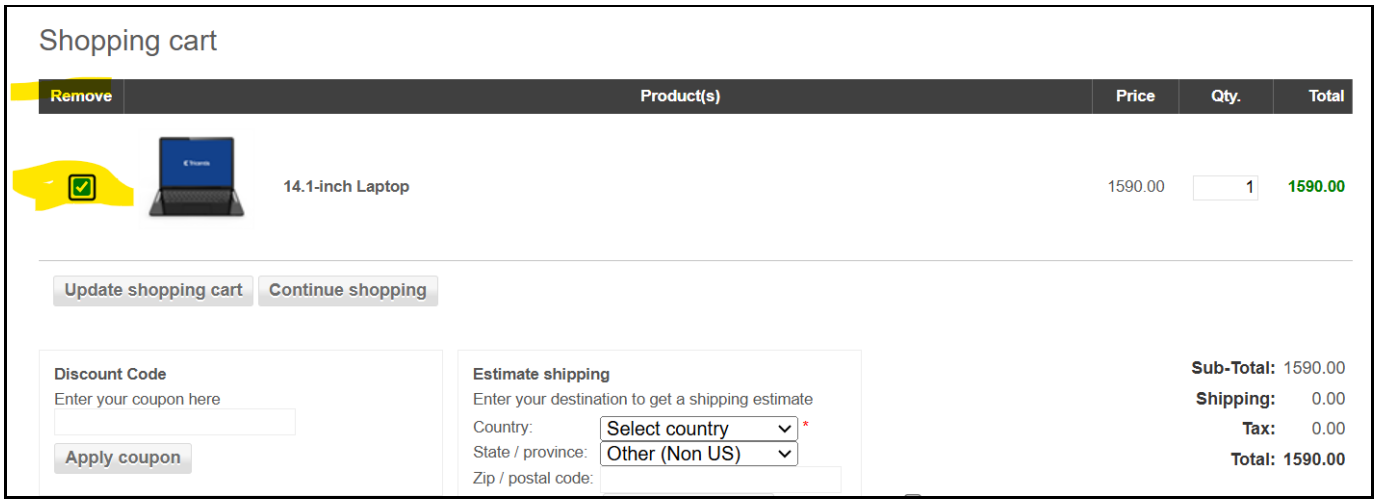
Test Data: Single cart item

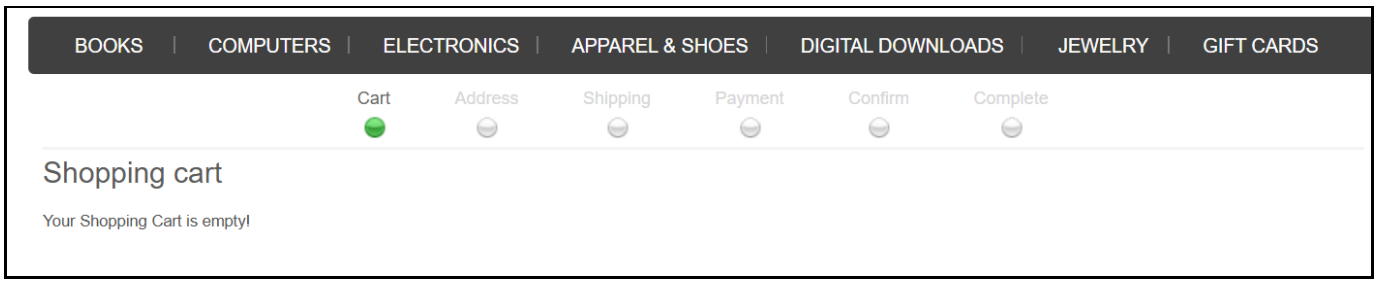
Expected Result: The selected product should be removed from the cart successfully.

Status: PASS

Execution Steps

1. Open the Demo Web Shop website in the browser.
2. Ensure at least one product is present in the cart.
3. Open the shopping cart page.
4. Select the remove checkbox for the product.
5. Click the Update shopping cart button.
6. Verify whether the selected product is removed from the cart.





TC_025 | Remove Product from Cart

Test Case ID: TC_025

Module: Remove Product from Cart

Test Scenario: Verify that only the selected product is removed when multiple products are present in the cart.

Test Data: Multiple cart items

Expected Result: Only the selected product should be removed, and the other products should remain in the cart.

Status: PASS

Execution Steps

1. Open the Demo Web Shop website in the browser.
2. Ensure multiple products are present in the cart.
3. Open the shopping cart page.
4. Select the remove checkbox for only one product.
5. Click the Update shopping cart button.
6. Verify whether only the selected product is removed and others remain.
